

ARTHELIO™

MobilityEssentials

Innovative biotic solution for Osteoarthritis treatment

Formulated and patented GMP pharma certified Arthelio™ brings a fresh and innovative approach to alleviating the pain and disability caused by osteoarthritis - by harnessing the power of the gut microbiome.

What's in it?

The patented formulation works through the synergy of *Bifidobacterium longum* CBi0703® lysate and vitamin C.

How it works

- Leaky gut may trigger inflammation and cartilage degradation, leading to osteoarthritis.
- *B. longum* CBi0703® in Arthelio™ aids in balancing intestinal microbiota, blocking potential endotoxin passage that can spark micro-inflammations, like in joints.
- Vitamin C facilitates collagen formation and healthy cartilage.

Remarkable Efficacy in Alleviating OA Symptoms

Arthelio™ significantly minimizes pain and reduces crisis frequency, allowing for improved mobility and superior quality of life. It works quickly: major benefits seen within the first month. Effects are lost upon discontinuation but quickly recovered when resumed, highlighting the importance of continuous intake. Its effectiveness may lessen or even eliminate the need for pain medications. Arthelio™ stands as a natural and safer alternative to long-term use of OTC drugs, minimizing the risk of adverse side effects.

GMP pharma certified

Available in capsule form for adults.

Compatible with available products for joint care.

BiomeNurturing™ Beyond Bacteria
