

## Enhance women's intimate defenses against infection

By increasing the population of beneficial bacteria in the rectal and vaginal microbiome and reinforcing the immune response, Equilibiom™ strengthens women's defences to resist genito-urinary infection such as bacterial vaginosis and candidiasis.

### What's in it?

Equilibiom™ contains a strain of *Lactobacillus Rhamnosus 35* (Lcr35®) that restores vaginal microflora and is also enriched with zinc.

### Natural and effective

Clinically proven by 12 independent trials, Equilibiom™:

- Increases vaginal Lactobacilli after oral supplementation
- Reduces the relapse rate and increases the time to first relapse in women with recurrent infection
- Is effective alone or in combination with antibiotics and antifungals indicated for vaginal infection
- Is useful as preventive and for the management of infection
- Alleviates vaginal symptoms and discomfort, increasing quality of life
- Restores vaginal microbiota after antibiotic therapy

### Certified and clinically tested

The strain is GMP pharma certified, and trusted by more than 12 million women worldwide.

### Easy to take

Available in capsule form for women and girls aged 12 years upwards.
